

SHADAB HUSSAIN

Frontend Engineer · React.js & Next.js Specialist · Full-Stack (MERN) · Web Performance

+91 8400841731 | shadab.hussain.tech@gmail.com | linkedin.com/in/shadab-dashboard | github.com/shadab0656

SUMMARY

Frontend-focused engineer (3+ years) building high-performance, production React.js/Next.js applications — SSR/ISR/CSR/SSG rendering strategies, component architecture, state management, and Core Web Vitals optimisation — with the full-stack range to own the Node.js/Express/MongoDB backend behind them. **Proven impact:** Lighthouse 60→90+, load times cut 35–45%, organic traffic up 30%+. Comfortable owning a feature end-to-end: UI, APIs, auth, and data — and shipping work designers, backend engineers, and product teams rely on.

TECHNICAL SKILLS

Frontend Core: React.js, Next.js (App Router, SSR/ISR/SSG/CSR), TypeScript, JavaScript (ES6+), HTML5, CSS3

State & Data: Redux Toolkit, Context API, TanStack Query (React Query), REST API Integration

Performance: Core Web Vitals (LCP, INP, CLS), Code Splitting, Lazy Loading, Tree Shaking, Bundle Optimisation, Image/Font Optimisation

UI & Styling: Tailwind CSS, Bootstrap, CSS Modules, Responsive & Mobile-First Design, Component-Driven Architecture, Design Systems

Testing & Quality: Jest, React Testing Library, ESLint — unit & integration coverage across core user flows

Backend (Full-Stack): Node.js, Express.js, REST API Design, JWT Auth, MongoDB, Mongoose ODM

AI/GenAI: Google Gemini API, structured LLM output validation with Zod

Tooling: Git, GitHub, Vercel, Webpack, Razorpay

WORK EXPERIENCE

Frontend Engineer

Jul 2023 – Present

Sat Sukrit Media Pvt. Ltd. · iirfranking.com · Full-Time, Delhi

- **Frontend performance:** scaled Next.js production apps to Lighthouse 90+, cutting load times 40%+ via SSR/ISR, lazy loading, code splitting, and tree shaking.
- **React/Next.js migration:** led Angular → Next.js migration for IIRF Ranking; SSR/ISR grew organic traffic 30%+ and cut API filtering response time 40%+.
- **Core Web Vitals:** optimised LCP, FID/INP, and CLS site-wide across 3 production platforms.
- **Component architecture:** designed and built a role-based (RBAC) admin dashboard in React with Redux Toolkit, powering editorial and admin workflows across 3 platforms.
- **Reusable UI:** shipped reusable, testable component libraries; wrote Jest + React Testing Library coverage for core user flows.
- **Full-stack ownership:** independently designed Node.js/Express REST APIs with JWT auth and MongoDB/Mongoose schemas for data-heavy content and ranking workflows.
- **Payments:** integrated Razorpay subscription billing end-to-end (checkout, webhooks, entitlement logic).
- Collaborated daily with design, product, and backend teams across a multi-platform codebase.

Frontend Developer

Mar 2023 – Jun 2023

Oye Busy Pvt. Ltd., Gurgaon · Part-Time

- Built responsive React.js components and integrated REST APIs; collaborated with backend engineers on API contracts and cross-team integrations.

PRODUCTION PROJECTS — SAT SUKRIT MEDIA PVT. LTD.

educationpost.in — Next.js · SSR/SSG · Node.js · MongoDB · Razorpay

- Next.js SSR/SSG front-end cuts load 35%+; RBAC dashboard, Razorpay subscriptions, Node.js/MongoDB backend — owned end-to-end.

iirfranking.com — Next.js · Tailwind · Redux Toolkit · Node.js · Razorpay

- Angular → Next.js SSR/ISR migration; 30%+ traffic growth, 40%+ faster rendering on data-heavy ranking tables.

icosaonline.com — Next.js · React · Tailwind · Razorpay

- Fully responsive UI with optimised rendering and Razorpay payment integration for seamless end-to-end transactions.

PERSONAL PROJECT

Resume-JD Skill-Gap Analyzer (GenAI) — React · Node.js · Express · MongoDB · Google Gemini API · Zod

- Full-stack tool comparing a resume against a job description via the Gemini API, surfacing missing/matching skills; used Zod to validate and enforce structured LLM output for reliable downstream parsing.

EDUCATION

B.Tech – Computer Science & Engineering

2019 – 2023

MGM College of Engineering & Technology, Noida
